Comments: To whom,

In my opinion the problem of to store or not to store the nations the nations Nuclear Waste in or at Yucca Mountain has been resolved for us by the events of September 11, 2001 in New York and Washington, D.C.

Once the host nation of the terrorist organization has been ascertained, the Nuclear Waste should be stored in a one inch layer about 20,000 feet above that nation. As we acquire a new supply of waste it can now be stored at the same place as there will be nothing below that can be affected adversely.

While you might find this idea a bit radical, be advised that we have the technology to make this a reality. Please take this matter under advisement.

Michael Charles McCaffrey Owens
